LEGEND

Wisconsin is **going in the wrong direction.**

Wisconsin made **no change.**

Wisconsin is **going in the right direction.**

OCMH Dashboard

What we added

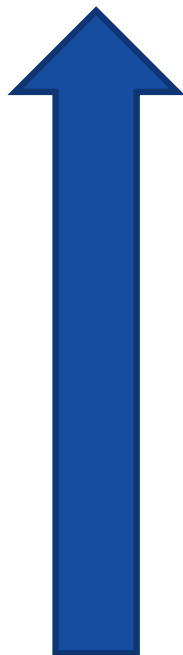

- Difficulty with social skills
- School connectedness
- Measuring providers differently
- Children with mental health conditions who did not receive treatment
- Difficulty obtaining mental health services
- Doctors who did not ask about parental concerns with behavior problems
- Suicide attempts
- LGBT teens considering suicide
- High school students feeling sad or hopeless

What we dropped

- Juvenile Arrests
- Illicit Drug Use
- Individual ACE's
- Flourishing behaviors
- Measuring alcohol use differently
- Insurance coverage
- General poor mental health

Wisconsin's Achievements

Wisconsin is **going in
the right direction.**

Social and Economic Factors

High School Graduation: **+2%**

Eighth grade math proficiency: **+2%**

4 yr old kindergarten: **97%**

Mothers with higher education degrees: **+2%**

Clinical Care

Provider access: **+2%**

Screening: **+6%**

Early prenatal care: **+2%**

Workforce capacity: **+436 providers since 2015**

Opportunities to Improve

Children, adolescents and young adults are not getting the help they need

Wisconsin is **going in
the wrong direction.**

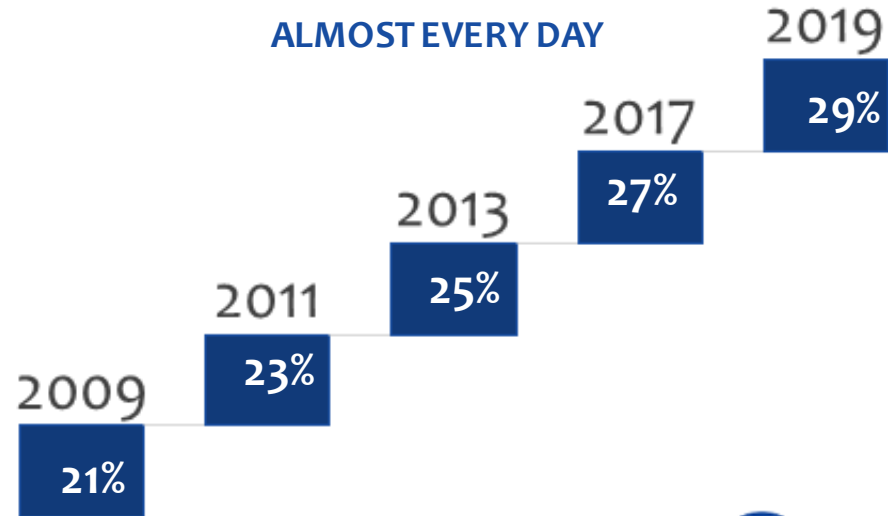

- Poor social skills
- Major Depressive Disorders
- Poor sense of belonging
- Risky behaviors
- Diagnosable mental illness
- Suicide and self-harm

Anxiety and Depression

Almost 60% of students in 9-12th grades experienced depression, anxiety, self-harm, or suicidal ideation in 2019.

15% of 12-17 yr. olds had an episode of **Major Depression** in the last year.

STUDENTS WHO FEEL SAD OR HOPELESS

Source: McCoy, Katherine. 2019 Wisconsin Youth Risk Behavior Summary Report. Madison, WI Dept. of Public Instruction, 2020.

Ensuring Positive Mental Health

Wisconsin is making strides in developing the mental health workforce, yet almost half of children are not getting the help they need.

66 counties have a psychiatrist shortage.

Of the counties that do have psychiatrists, some don't even treat children.

SOCIAL DETERMINANTS DRIVE 80% OF MENTAL AND PHYSICAL HEALTH OUTCOMES

Equity in Child Health and Well-Being

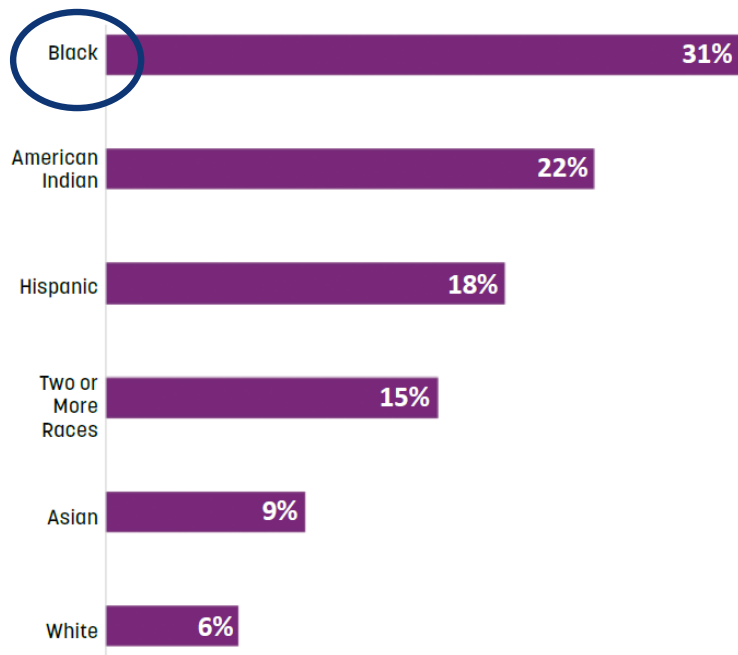

- Education

- Economic

- Mental Health

Educational Equity

HIGH SCHOOL STUDENTS NOT GRADUATING ON TIME⁹

90% of all kids graduate within 4 years... most of the kids who don't are Black.

Economic Equity

Wisconsin ranks

50th in the nation

for having the most extensive
Black vs white racial equality gap

Wisconsin ranks

48th in the nation

for having the most extensive
unemployment rate gap

- Overall
- Median annual income
- Labor-force participation
- Poverty rate

Wider unemployment gaps:

- District of Columbia
- Illinois
- Michigan

Mental Health Equity

In Wisconsin, 2018

11% of Black children

Needed but didn't receive treatment, as compared to only:

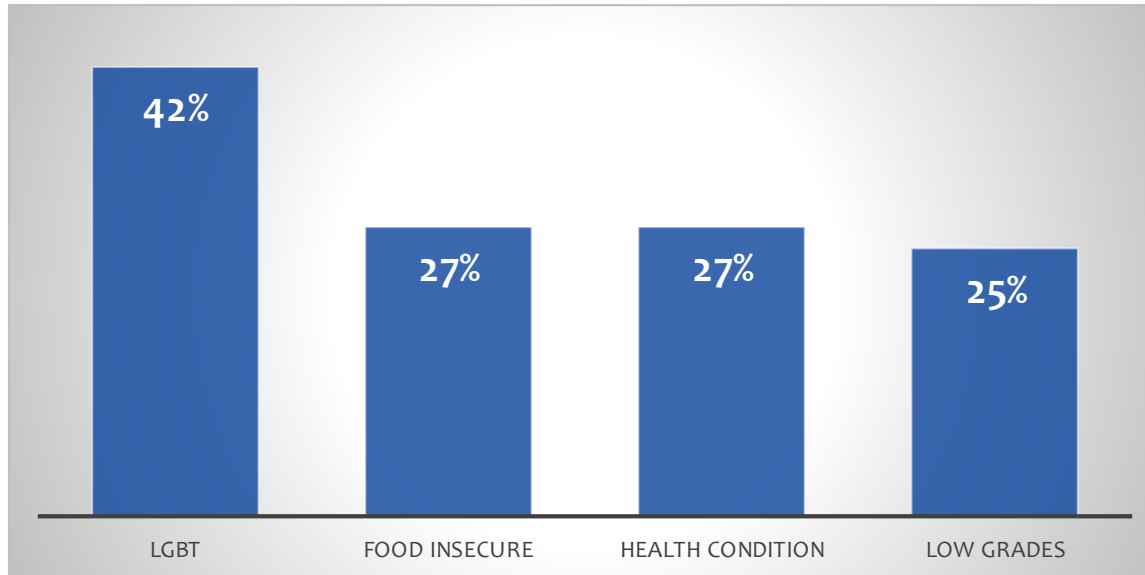

2% of white children

As a result of geographical and insurance barriers, diverse populations are more likely to:

- Delay treatment
- Stop treatment
- Not receive appropriate treatment

Suicidality

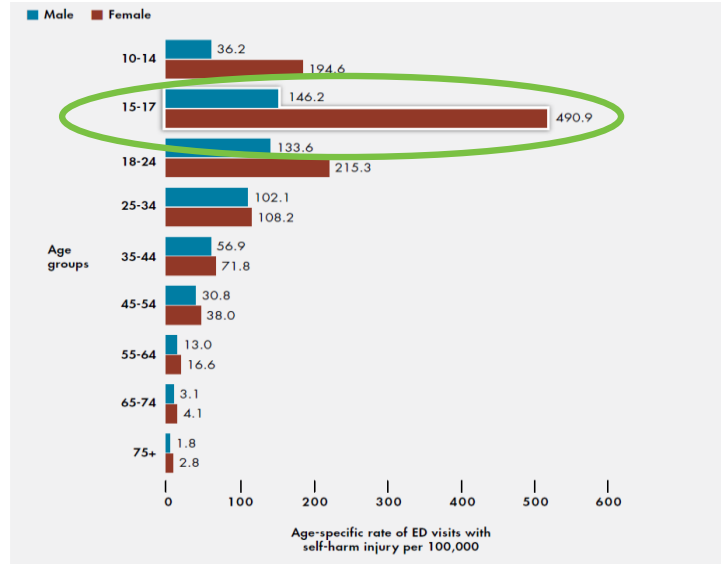

16% of all high school students have considered dying by suicide.

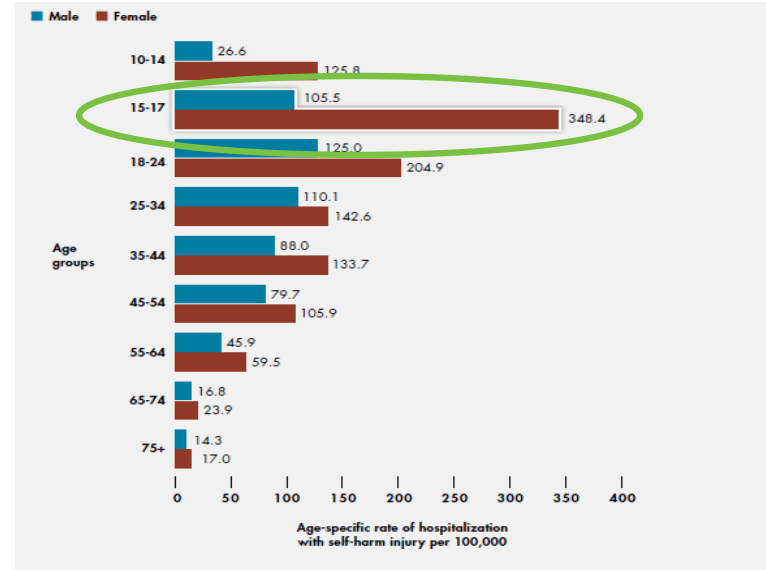

Source: McCoy, Katherine. 2019 Wisconsin Youth Risk Behavior Summary Report. Madison, WI Dept. of Public Instruction, 2020.

SUPPORTING CHILD WELL-BEING THROUGH BUILDING SOCIAL & EMOTIONAL SKILLS

JUNE 2020

WHY THIS MATTERS

Building social and emotional skills are critically important for life-long mental wellness, achieving academic and career success, and enhancing social connections. Children require supportive adults to teach and model these skills at home, in childcare settings, and at school. Wisconsin utilizes a nationally recognized model to assess competency in five core areas.*

For a detailed description of these competency categories, please visit www.coastl.org.

WHAT THE RESEARCH SAYS

Extensive research conducted on child development shows that when kids master the 'soft skills' developed by social-emotional learning, it is associated with greater well-being and academic performance.¹

Students who participate in evidence-based social-emotional programs showed an **11% point gain** in academic achievement.²

Social-emotional programming decreases the likelihood of living in public housing, receiving public assistance, having contact with the police or spending time in a juvenile detention facility.⁴

For every dollar invested in social-emotional learning programming, there is an **\$11 return on investment** in long-term benefits to the student and to the community.⁵

SOCIAL-EMOTIONAL SKILL BUILDING IS VITAL FOR CAREER READINESS

92% of LinkedIn hiring managers say soft skills are more important than technical skills.⁶

WHAT'S HAPPENING IN WISCONSIN?*

Wisconsin has social and emotional learning standards and competencies designed to guide curriculum decisions and ensure developmentally appropriate instruction in building social and emotional skills.

Many early childhood programs in Wisconsin use an evidence-based framework called The Pyramid Model which enhances the capacity of teachers, programs, and communities to responsibly and intentionally address the needs of infants, young children and adults who care for them.

A recent research study conducted in Wisconsin classrooms on the effectiveness of the Pyramid Model framework found significant evidence in decreasing challenging behaviors and increasing social skills in young children.

*ODM would like to acknowledge the Wisconsin Alliance for Infant Mental Health and the Department of Public Instruction for their contributions to this section.

SUPPORTING CHILD WELL-BEING THROUGH IMPROVING SCHOOL OUTCOMES

IMPACT OF ONLINE COURSEWORK¹

Elementary, middle and high school students accustomed to in-person learning have suddenly been forced to learn online due to the COVID-19 pandemic. The long-term social and emotional consequences of online learning are not yet known.

A Wisconsin study provides some insight into how many online hours on each class are necessary to achieve academic success:

- Students who engaged in their online course for at least 2 hours per week had better school outcomes.
- There is little difference in one semester whether a student spends 2, 4, or 6 hours per class per week engaging in online coursework.
- Students who spend 1.5 hours a week or less per class are at risk of poor school outcomes.

WHAT WE CAN DO

PARENTS

- Talk to your child's school or childcare provider about their discipline policies, and work together to prevent any possible suspensions or expulsions.
- Set expectations about time spent on each class per week, and regularly check in with your child's teacher to gain a better understanding of the areas in which your child may be struggling.

EARLY CHILD EDUCATION PROVIDERS

- Prevent expulsions by increasing family engagement to address challenging behaviors and implement a curriculum like the Pyramid Model to build children's social and emotional skills. (For more, see our June 2020 Post Sheet on Building Social and Emotional Skills at www.children.wi.gov.)
- Apply principles of trauma-informed care to support the well-being of staff.
- Encourage staff development and training on exploring implicit bias.
- Seek support through the YoungStar quality rating system.

TEACHERS AND DISTRICTS

- Increase the use of positive behavior interventions and supports, and establish limits on the use of law enforcement in schools.
- Identify students who are spending less than 2 hours per online class, per week, especially those students with a disability or who are economically disadvantaged.
- Retain specialized instructional personnel such as social workers and career counselors who assist students to prepare for their career.

POLICYMAKERS

- Prioritize spending on early care and education to reduce the school-to-prison pipeline.

Over the last 3 decades, Wisconsin has increased spending on the corrections system by 36%, which is more than the national average, but only increased spending on Pre-K-12 education by 72%, which is 36% less than the national average.²
